

Topics Covered:

- Maths – Algebraic fractions, solving equations
- Science – sexual reproduction
- English – Looking at features of spoken language
- P.E – Basketball, football, tennis
- Travel training
- Duck raising
- Chicken raising
- Looking after the guinea pigs

This week students have been finishing work and wrapping topics up ready to study new topics after the half term. There has been a lot of practical, fun and engaging tasks this week to keep students engaged.

A BIG focus of our week before Easter, has been hatching and raising ducks. Students have loved looking after the ducks and following the whole process through to the end. Students have rehomed the ducks and even taken some home themselves to keep!

Next... students are raising chickens, these are already in incubation! One student has taken home the school therapy guinea pigs in order to sign off her Asdan unit 'looking after a pet at home'.

Quotes:

The ducks are so fluffy and cute - BF

I can't wait until we have chickens – DB

I enjoyed creating the tallest tower in Science – CB2
