

**Outcomes:**

- Exploring rivers
- Discovering wildlife
- Learning about the birds.
- To see what animals live in rivers.

**Description of trip:**

On Thursday, class Smarties went out on a trip to Frampton Marsh to continue our exploration of rivers and wildlife.

We started off our day with a chat by a member of staff at Frampton. He spoke about the different birds in the area including (Lapwings and Redshanks) and gave us some information about them.

We stopped by the river; that was running through the marsh, to have a look at the fish and shrimp. During this, BS2 managed to drop his clipboard of work into the river. Luckily someone who worked there, was able to fish it out. We opened up the clipboard to discover 2 jumping shrimp! We put them back in the water and carried on our day. Later in the day when BS2 opened the clipboard again, he found a dead fish! so the kids held a fish funeral. It was lovely to see the children working as a team and working hard.

The class also enjoyed their flower hunt and were enthusiastic while searching for the different plants that grow around the Marsh.

**Quotes:**

"Look at all the fish swimming together!"

"What are them birds? They look cool!"

"The water is 7 metres deep!"
