

Outcomes:

To be able to swim with confidence.

To be able to swim underwater and on their back.

To understand how air resistance works.

To find and identify various insects and plants life.

Puffin's day out on Tuesday 5th May started with a swimming lesson which they really enjoyed. The class have been learning to swim under water and on their back using the correct breathing techniques. We then went on to Snettisham Beach and Woods for their forest school session. Puffins had a great time at the beach, running and chasing waves in the wind. The weather unfortunately was not very kind to us so we headed into the woods to shelter from the wind and rain. While on our walk in the woods we rummaged through undergrowth in search of fungus and bugs.

Quotes:

It is so windy, I am leaning over and not falling.

I love swimming underwater.

It is so cold, wet and windy!
