

Outcomes:

- Team building
- Looking at different habitats.
- Understanding the name of different shells.
- Gaining knowledge on different animals in the sea.

Description of trip:

Today at Forest school the children had great fun exploring on the beach. Linking to our Celtic topic at school the children went out and found lots of different shells and made their own Celtic patterns out of Shells. They also managed to find some animals in their natural habitat such as Crabs and Fishes.

The children had a lovely time exploring the beach and discovering fun and exciting objects around the beach. They enjoyed having a picnic lunch on the beach with the sun shining.

Quotes:

This shell is massive!

I love it here

Lovely weather to be at
the beach
