

## Outcomes:

- 'Real-life' work experience
- Science learning
- Development of confidence
- Development of communication skills
- Development of friendships and social skills
- Learning new skills relating to animal care and maintenance

## Description of trip:

This half term some of the children have chosen horse riding at Chestnut Farm Equestrian for their afternoon activity. This is a great part of their day that they really look forward to. This peaceful outside space really allows the children of our school not only to relax but to learn many new skills: how to handle the horse on the ground and also how to ride to a good standard, this can sometimes be hack around the local area. Our children really enjoy this too as there is a lot of lovely scenery. Horse riding takes a lot of patience and determination which is a great skill for our children to learn.

## Quotes:

"Digby is my favourite pony"

"how long will it be until I can jump"

"what is the difference between a horse and a pony"
