

Outcomes:

- Listening and following instruction from staff and peers.
- Team building skills.
- Demonstrating good behaviour in the public.
- They can learn about animal care, the source of food and the importance of nature.
- Good communication skills.

Descriptions of trip Anglia Way-

Nurture trip was at Crocodile Farm at Old Hurst. Firstly, we arrived at the crocodile farm and went and got our tickets once we had got our stamps on our hands we started to walk around. The first animals we came across was Lion and the lionesses which the lion was very sleepy and they laid beside each other and had a nap. Once we had seen the Lions we went and walked around and saw a few more animals.

After we had seen the lions, we went and saw the goats. The goat kept making some funny noises and messing around with the other goats which was funny for the pupils and staff to see and the goats were so friendly they would be coming up to the fence wanting food and was trying to lick our hands.

Then we went and washed our hands then we to look at some more animal such as; bears, parrots, cats, owls and rabbits. Then we went over to see the Meerkat's which all the pupils loved to see, the meerkats were making funny noises and kept standing up and staring at us even in their little houses. Once we had seen the Meerkat's we went and saw the Crocodiles, it was really hot in there for the crocodile environment and one of the workers were in there talking about how long he had his crocodiles and how he has expanded his business since he started.

After that we went back to the van and had our lunch and made our way back to school.

Quotes:

Them cats are so big and beautiful.

There are loads of crocodiles.

I want to take a goat back home or to school.
