

Outcomes:

Understand basic astronomy concepts

Awareness of space exploration

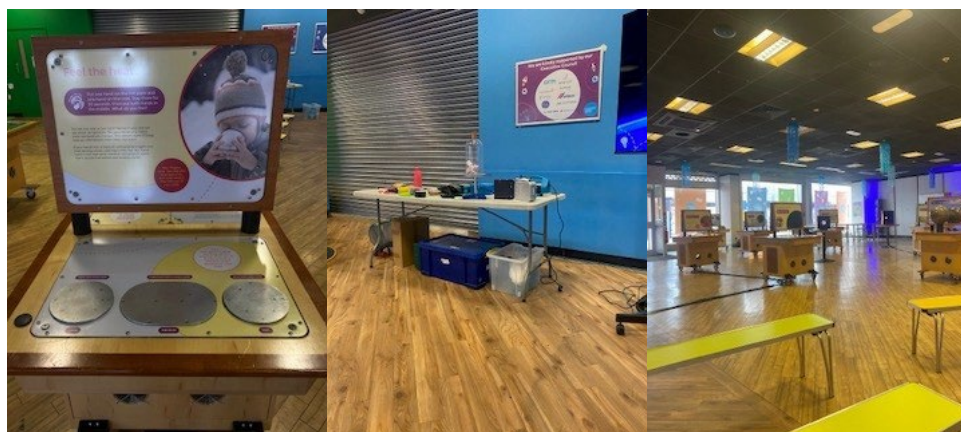

Earth and space relationship

Scientific thinking

Curiosity and inquiry

Problem solving skills

Use of technology and tools

Today we visited the Cambridge Science Centre in Wisbech horse fair.

The students started the day by looking at all the experiments that were dotted around the room. Students had free reign to test all on their own and get creative!

After around 45 minutes the 2 ladies that were hosting the day put on a science show. This show was all about space!

KG and EM thoroughly enjoyed the show and got to take part at times!

Quotes:

Wow that rocket went so quick!

KG

I really enjoyed making the dandelions

I loved the hover board

EMR
