

Outcomes:

- Learning

- Revision

- Zoom education

- Engaging activities

- Group working

- Practical activities

Description of the week:

This week students have enjoyed practical activities during science lessons, they have been focusing on creating circuits and electricity flow. Some students have been studying vision and eye sight and others about communicable and non-communicable diseases.

During English lessons students are now reading and working from a book of their choice and will be creating a character profile and description. Maths, students have still been focusing on multiplying fractions by a whole number. In ICT students have been learning how to format spreadsheets and using Excel as a calculator. During humanities students have been learning about Hinduism and 'Life After Death'.

During key-working students have been focusing on using their Kindles and reading.

During afternoon choice activities students have been getting involved in outdoor games, board games, hair and beauty and film afternoon.
