- Zoom lessons
- Forest School
- Ancient Egypt- Rosetta Stone
- Cooking- Pizza Tortillas
- Smarties Quiz
- Maths- Multiples and Factors
- English- Grammar Work
- Science- Healthy Living
- World Book Day
- PE- Hockey Skills

Description of the week: This week the Puffins and Smarties have been doing lots of grammar work in literacy: conjunctions and homophones. In maths the Puffins have been looking at multiples and factors, which have helped them with their times tables. In history they have carried out some work on the Rosetta stone, one of the most important discoveries of Ancient Egypt. In science Puffins have started looking at healthy living – this week having studied the different food groups. In the Smarties class this week they have been looking at finding fractions and percentages of amounts in Maths. They did find this a bit tricky to start with but now they have the hang of it they think it is super easy. Next time there is a sale on, we will be able to work out the discount really quickly! In science they have been learning about how the digestive system works and labelling the different parts. The children found this very interesting although rather disgusting! In Koalas this week they have creating a description of their own newly discovered animals. They have also been looking at the structure of different writing pieces and how they may start to create their own descriptive writing piece. On Thursday this week was World book day, the different classes dressed up, the Smarties were dressed up like characters from Charlie and the Chocolate Factory, whilst the Puffins came in Superhero Costumes and a footballer.

Quotes:

"What have you come dressed as? RIC to the Puffins
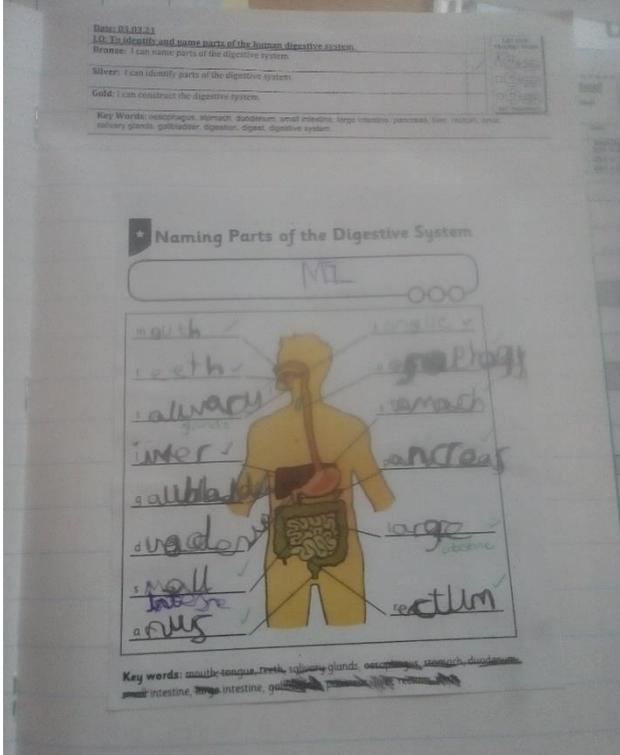

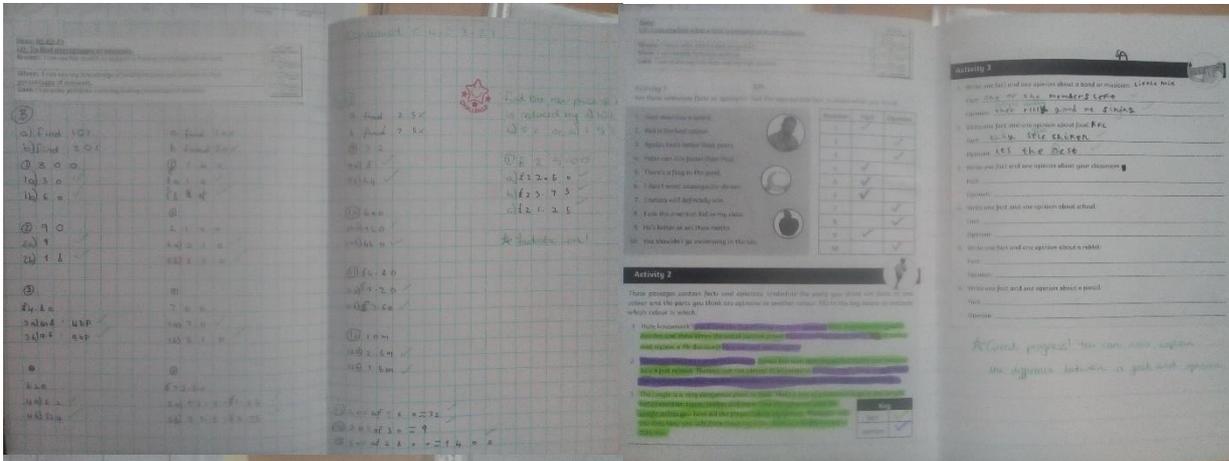

"I enjoyed making my tortillas"- LC

"How can we play hockey with just three of us?"- LC

The Puffins class at Forest School getting ready for their hike.

CH displaying his cooking skills.

Some great learning from the Smarties Class.

Forest School lunch this week.
