

Primary 2 – Sky Museum

Primary 2 visited the Solent Sky Museum. This was part of our learning in humanities about World War 2. We had the opportunity to sit in different World War 2 planes. One of the volunteers was very helpful and explained how the controls worked and how the planes were used to bomb submarines and German planes.

We also visited the new exhibition that has recently been built showing what life was like during the war for those people living in Britain; we were amazed at how small the Anderson shelter was!

The Solent Sky Museum has a whole slew of other attractions our students visited throughout the trip, from the world's largest flying boat in operation, to the Supermarine Spitfires used during WW2, and created right in Southampton.
