

## Merida

Merida is a 22 placement residential Specialist Mental Health Service (SMHS). Our grounds include four individual homes, each with a capacity to provide accommodation for up to 5 young people and an intermediate care home that can support up to 2 young people at a time for up to 28 days while we assess their next steps. Merida also includes our on-site school and outdoor facilities which will all enhance the experience for young people whilst at Merida. At Merida we will specialise in supporting young people who have ongoing mental health needs that may prevent them from functioning in the community without continued support.

Our vision for Merida is to provide an outstanding level of care and support to the young people who are living in the Merida homes; we aim to provide an environment that both stimulates and nurtures young people whilst ensuring they feel relaxed and comfortable. We will promote an environment where young people can develop the academic, practical and social skills needed to thrive and grow from young person into adulthood.

Our Team at Merida will offer optimum experiences for young people to recover and return to their usual places of residence or transition to a more independent community setting. The Team at Merida will develop and build on relationships with young people; each young person will have an individualised care plan adapted to how they develop and change over time. This will ensure individual needs are being met and outcomes are being achieved.

**Cambian Specialist Mental Health Services** offer residential placements to children aged 12-18 who are or have experienced or are experiencing significant mental health needs. Our services are registered with Ofsted with care, clinical and education offerings.

Our vision at our specialist mental health services is to provide the highest possible level of care to the young people that reside at the home and to promote a relaxed and nurturing environment, at the same time encouraging the young people to develop the academic, practical and social skills needed to thrive and develop from a young person into an adult.
