

Outcomes:

- Learning to walk in public
- Social and emotional development
- Observing around themselves
- Being mindful of others
- Behave well in public.

Report:

Today the class visited Ferry Meadows to support their social, emotional, and personal development through a structured outdoor learning experience.

During the visit, pupils had the opportunity to:

- **Develop social skills** by practising appropriate behaviour in a public setting.
- **Enhance personal responsibility** through following instructions and understanding boundaries in an open environment.
- **Build teamwork and resilience** by taking turns, sharing equipment, and problem-solving in the play areas.
- **Experience positive reinforcement** by being rewarded with ice cream at the end of the trip, which celebrated their engagement and appropriate conduct.

This visit directly contributed to pupils' learning in the areas of **PSHE, SEMH development, and social communication**, providing them with meaningful real-world experiences beyond the classroom.
