46 Registered Capacity

### We could not be prouder of the outcomes of our Wing College students

“ We had experienced so many other schools in the earlier part of his academic journey where James hadn't really had a chance to succeed. When James first looked around Wing college in 2021 he thought it was exactly where he wanted to be. He's now so confident and proud of what the staff have helped him to achieve. He says himself he's now a better, happier version of him. ”

– Parent

#### Connor

As part of our 'Preparation for Adulthood' programme, the college employs students each year in either a part time or temporary role. This supports them in their chosen field, gaining experience to help them achieve full time employment in the future.

Connor successfully interviewed for the role as Grounds-Person at the college and has been instrumental in redesigning and refurbishing the on-site garden and the gardens at our four homes! Connor has an outstanding work ethic and would be an asset to any company. Everyone is delighted with the beautiful gardens we have to work in and enjoy.

#### Leah

We were delighted to receive an email from Leah, a former student at Wing College. She couldn't wait to tell us that she had just secured the first job she had ever applied for and will be joining a local special needs school as a Teaching Assistant in September. We are so proud of Leah who told us that Wing College had provided her with a sense of identity and a huge boost of confidence that had enabled her to go for the job she wanted.

## Meet the Team

**Cassandra Pollitt**  
Principal

**Magdalena Lawrence**  
Assistant Principal of Education

**Louise Sattin**  
Assistant Principal:  
Admissions &  
Transition/Core Lead

the team click here

**The team at Wing College are truly committed to seeing the students progress to a happy and fulfilled next step, where they can move away from over-reliance on social and community services to feel proud and confident in their place in our society.**

- We offer a tailored curriculum based on each student's objectives. Our team work around the student to offer a balance of academic excellence and broader independence and resilience as part of an integrated approach.

- Students are able to access a bespoke level of support. This can include therapeutic support and targeted intervention and help. All stakeholders work around the student to generate the best program to allow each student to really thrive as they prepare for adulthood.

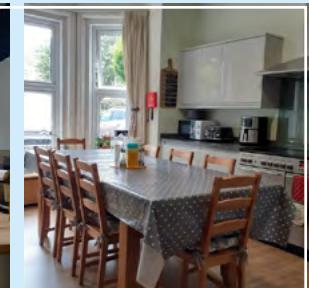

- Our students achieve markedly better outcomes in terms of both accreditation and destination than nearly all other students from similar routes into specialist FE colleges.

- Many, but not all, of our students choose to make their lives in the beautiful areas of Bournemouth, Christchurch and Poole or in neighbouring counties such as Dorset or Hampshire.

- Families report the life changing impact that they have seen both in terms of academic and emotional growth and the benefits it brings to them in the home and wider environment.

- The leadership at Wing College have ambition for all students to gain fulfilling work experience that truly upskills students in focussed skills for the workplace. We currently support students in wide array of work experience opportunities.

**We have 4 diverse and beautiful residential homes** set in lovely community settings that allow our students a balance of being able to access everything the local area offers, with the comfort and support of a highly specialised, intensively staffed team.

**The goal is for students to gain independence and purpose.**

**The team support the students to get there in a way that works for each individual.**

Each home develops a support plan, with a dedicated keyworker for each student, this allows a graduated and planned level of support towards independence. Providing each student with the balance of comfort and challenge. Allowing them to gain confidence, skills and independence in a safe and structured way.

**We believe in a truly bespoke offer and are committed to developing new opportunities each year, which our team would love to talk to you about.**
