

## Woodwork Wonders

Our students have been thoroughly enjoying hands-on woodworking projects, developing both practical skills and creativity. It has been wonderful to see their enthusiasm as they design and build a variety of items from scratch. So far, they have created beautiful wooden planters, carefully crafted bird boxes, and even their own seating bench for the garden.

The bench in particular has been a real highlight, giving students a sense of pride and ownership as they contribute something lasting to the school environment. These projects are not only helping them learn valuable woodworking techniques, but also encouraging teamwork, problem-solving, and confidence.
