

Outcomes:

Physical coordination, teamwork and cooperation, communication, emotional regulation, problem solving, observation, personal social and emotional development, building confidence around animals, follow instruction, care and empathy, responsibility handling animals gently and how to look after them.

It was a wonderful day at Snettisham Park, filled with exciting activities and time to enjoy the playground.

We started the day with a tractor ride to the red deer field. The children had the opportunity to feed the deer and see them up close. It was especially exciting when the deer came right up to the tractor to be fed. On the short journey, we also spotted ducks, geese, and rabbits, which added to the children's enjoyment and curiosity.

Back at the farm, we visited the young animals, including newborn lambs and calves. The children were able to feed the goats and even brush a horse, giving them a hands-on experience with the animals.

We finished the day with a lovely activity—helping to bottle-feed lambs and guiding them back to their pens.

It was a joyful and enriching experience, and the children showed great enthusiasm, curiosity, and care throughout the day.

Quotes:

Aww! So cute...

So many Deer!!!

Let's go play!!!
