

## Outcomes:

- To Explore and learn.
- Behave well in public.
- To take part in a beach clean-up to give back to the community.
- To learn how to respect our environment by making sure it is litter-free.

Description of trip: Our last experience day before the May half term and our teacher decided that we would do a beach clean up at Hunstanton. She taught us that it is really important to keep our seas and oceans clean and free from plastics and debris because fish and sea creatures can get caught in the rubbish. Fish can also eat the plastic and then we get a build up of microplastics within our food chains, which can get into the human body. So, we set to work on Hunstanton beach collecting any rubbish that we could find. It was really fun with the hand grabbers. Our teacher said it was like our treasure hunt, one pupil described it as a really bad treasure hunt, as we were collecting rubbish. To be fair, Hunstanton beach is very clean and we did pick some litter, but we were pretty impressed by how clean it was. Our teacher got us a 'sweet treat' as a reward from Mr Bun's the Baker. Thank you Cambian!

## Quotes:

"Sweet Treat"

"It is like a treasure hunt"

"Look what I found...."
